Nancy, France

Passionate about where design meets development, I've spent four years building React interfaces where UX/UI and animation come together to delight users.

Experience

Oppus by Lefebvre Dalloz — Sep 2021 — Present

Frontend developer

- Designed and built a complete, reusable UI kit with React, TypeScript and SCSS to keep the product consistent.
- Turned Figma designs into responsive, fast interfaces, with close attention to UX and accessibility.
- Led a team of developers: agile rituals, code reviews and shared coding standards.
- Solved complex client issues and improved application performance.
- Mentored apprentices and helped the team level up on the modern React ecosystem.
- Worked with Product Owners on estimation, planning and technical follow-up.

Selected work

Apogee Design & development

Mobile app following esports teams live across LoL, CS2 and Valorant.

Casa Gioia Brand identity

Identity for a Mediterranean catering and grazing-table studio.

Lucarne Design & development

TV app interface and identity, designed to be used with a remote.

Education

Epitech — European Institute of Technology — 2020 — 2022

Discovered web development and sharpened my skills through a range of hands-on projects.

Skills

React.js, Next.js, TypeScript, Node.js, AdonisJS, Prisma, PostgreSQL, Tailwind CSS, Motion, Figma

Languages & more

French (native) · English (C2) · Driving licence (B)
